Subject: RE: Latest communication with Andre Patterson at Treasure Island

Just to add one more thing not directly related to Patterson. As part of there efforts to increase communication with the community, The Navy is holding a community open house on Saturday, May 31. The Navy project managers directing several ongoing site investigations will be there to explain to the community what they will be doing and the steps they are taking to protect the residents from exposure to chemical and/or radiological contamination.

Subject: Latest communication with Andre Patterson at Treasure Island

Hi Dana,

I'm writing to let you know about our latest communication with Andre Patterson. He contacted David Stensby, the Treasure Island EPA RPM last week and left a very contentious message (as you are familiar with given your interactions with him) threatening to elevate his concerns to Barbara Boxer and Nancy Pelosi's office. The Navy held their BCT meeting this week and Mr. Patterson was discussed. He has been contacting

the state and the Navy, as high up as the Navy Admiral in San Diego. In those calls, he's threatened to call the White House. The Navy provided him with the White House contact information. He has threatened to sue the State of California, the Navy and the Navy BRAC Environmental Coordinator personally. As it turns out, Mr. Patterson is not a resident at Treasure Island but has a friend who is, Felicia Sample. Both Mr. Patterson and Ms. Sample have been involved in numerous lawsuits in the past, and as a result, the State of California has classified them both as "vexatious litigants" pursuant to the California Code of Civil Procedure section 391.7 (if you'd like to know the specific definition let me know and I'll forward it to you).

The Navy is taking steps to be more proactive in dealing with the media, offering in-house meetings with residents to answer questions and explain the work being conducted at the site, and to increase communication with residents where sampling is being conducted. They have brought in high level Navy staff tasked with developing a broad media plan.

We don't believe that Mr. Patterson's threats to contact Boxer and Pelosi will get much attention but we are on alert in case we are contacted by their staff. As we've discussed, Treasure Island is a non-NPL site and the state is the lead regulatory agency. EPA's role is a minor supportive one. If Mr. Patterson contacts you again, I recommend that you direct him to contact the state RPM, Remedios (Medi) Sunga at (510) 540-3840.

Let me know if you have any questions.

Loren
